## **Candidate's experience of PMKVY training program :**

After aptitude test she was selected for Ring Frame Doffer. When she came to SRSL, she was nervous because she belongs to tribal village background . She don't able to speak even one word with any trainer and class mate. She was not touching even if bovine during practical. The sound of Ring Frame Machine was painful for her but by providing regular support from her trainer she started pick up her confidence. After two weeks she was little comfortable and put off her veil. She did all classes theory as well as Lab regularly. After a one month she started to ask question frequently. In the end of 45 days training she have a good command over Doffing and getting . Now she placed in SRSL, syntex unit, and happy to support her family. She has a dream to provide good education to her younger sister and save money for her marriage.
